

Mersea Island School

Science in our school is best when.....

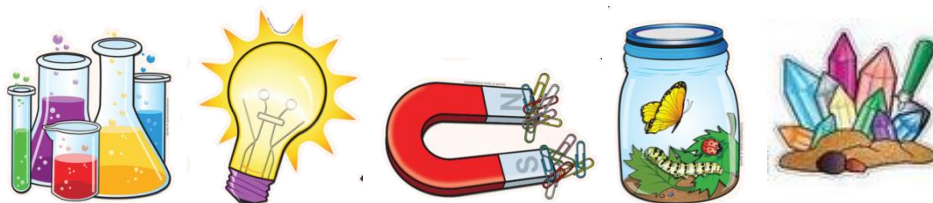

It is practical and fun
and all pupils are actively engaged.

Pupils have the opportunity to explore and are
inspired to question things.

You can feel the 'buzz' of excitement.

It is enhanced by embracing opportunities to learn
outside the classroom.

The whole school participates in science events
within school and the local community.

Our existing Science Principles were updated and agreed following a Pupil and staff discussions about what "good" science looked like at Mersea Island School. Dec 22.
